

RIG CLEANING KEYS TO SUCCESS.

HydroChemPSC has offered offshore and onshore cleaning solutions to the oil and gas industry for greater than 30 years. As a trusted business partner and undisputed safety leader, we understand the significance of offering experienced personnel, providing advancements in technology, and being strategically positioned. This will ensure exceptional results.

CLIENT INVOLVEMENT.

Truly understanding our clients' requirements allow our teams to respond with confidence, coordinate effectively, and remain involved throughout the project until completion. Recognizing the unique challenges of the complex mud systems employed today both onshore and offshore and the critical path to ensure no cross-contamination, HydroChemPSC offers maintenance cleaning of the shakers, de-sanders, de-silters and mud pits; we understand that specific standards of clean must be adhered during the process.

OFFSHORE RIG CLEANING SOLUTIONS.

Experienced personnel and innovative cleaning processes guarantee client expectations are exceeded. Whether deepwater drill ships or jack-up rigs, our approach is the same; supervisors and cleaning technicians are SEMS compliant and fully trained to perform at the highest level.

THE HYDROCHEMPSC VALUE

- Unrivaled experience
